Technical Tricks and Innovation

This category showcases innovative techniques and technologies and consists of case reports showing unique solutions to difficult problems related to any of the topics above. The abstract should report a description of preliminary findings using new technology. This category is not designed to serve as an advertisement for a particular commercial product, so please avoid the appearance of commercial bias. Presentations in this category should be submitted as a single slide (similar to a poster), and will be displayed digitally throughout the course of the meeting.
